# ABOUT COMPANY

SMITH BROTHERS CORPORATION was conceptualized in June 1985, when a group of businessmen met at the Mandarin Oriental hotel in Makati City, Metro Manila. After discussion of business subjects, the talk meandered to the praiseworthy efforts and unselfish service of the Philippines Business for Social Progress (PBSP), an organization funded from part of the net income of prominent corporations. While those present were related to some of these corporations in one way or another, they were not direct participants in the PBSP projects. The talks developed into brain storming to find out what they can contribute to our community. Thus, Smith Brothers was born out of a desire to be of help towards sanitation and promotion of a healthy environment.

# **WELCOME MESSAGE**

Welcome to SMITH BROTHERS CORPORATION, where innovation meets excellence. We are thrilled to have you discover our story, values, and the exceptional solutions we offer. At Smith Brothers, we pride ourselves on our commitment to delivering unparalleled quality and customer satisfaction. As you explore our profile, we invite you to join us on a journey of innovation, collaboration, and success. Thank you for choosing Smith Brothers Corporation – where your needs are our top priority.

# OUR VISION

The rapid growth of our country's population will continue to influence lifestyle, commerce, and the environment, among other factors. Health will remain a major ongoing concern, with proper sanitation playing a crucial role. It's imperative to emphasize a positive approach in controlling negative factors that affect the environment.

Smith Brothers Corporation envisions itself at the forefront of controlling household pests and other carriers of disease, contributing to a healthier and safer environment for all.

# OUR MISSION

Pest control service is measured in terms of results, which depend on various factors. We are dedicated to satisfactorily providing the required services to support our clients in maintaining maximum pest-free sanitation, thereby contributing to a healthier environment.

We commit to deliver personalized pest control services to the best of our knowledge, experience, and ability. Our goal is to lead the way in effectively controlling vermin to promote a healthy environment for the benefit of all.

# OUR SERVICES

## General Pest Control

### **SURFACE SPRAYING**

This service addresses the control of household pests such as cockroaches, ants, bedbugs, mites, fleas, and other breeding places for crawling insects. The insecticides used are both effective and have low toxicity to mammals, ensuring safety.

### **MISTING**

This service targets the control of both crawling and flying insects through the dispersion of water-based insecticide into the air. This method generates droplets that remain airborne and effectively penetrate into cracks, crevices, and partition walls that may not be reached by traditional spraying methods.

### **RAT AND MOUSE CONTROL**

This service aims to control all rodent species by strategically placing rodenticide-laced baits and glues in areas where rats typically roam, seek food, and hide.

### **GEL BAITING**

This service focuses on controlling cockroaches by applying gel spots in areas where they congregate, crawl, and hide. The gel provides long-lasting control and may remain effective for several weeks. Unlike sprays, the gel bait attracts cockroaches or ants to feed on it. After consuming the bait, cockroaches will return to their harborage, contaminating others through tertiary effects.

# **OUR SERVICES**

## **TERMITE CONTROL**

### **EXTERRA TERMITE INTERCEPTION & BAITING SYSTEM**

The Exterra baiting system eliminates the entire termite colony by installation of termite bait stations, attracting them baiting it to eliminate the termite colony.

It has its unique termite bait Requiem (innovated and non-toxic bait), termites feed on this as a natural food source spreading the bait back throughout the colony over 2-3 months eliminating the entire nest and its queen.

### **TERMITE EXTERMINATION AND PREVENTION PROGRAM**

#### **PRE-CONSTRUCTION TREATMENT**

Termiticide solution will be uniformly applied into the ground by the use of power sprayer. This is to saturate the subsurface soil thereby attaining better leaching effect.

#### **POST-CONSTRUCTION TREATMENT**

This treatment may involve a combination or comprehensive approach, including drenching, rodding, trenching, and trophallaxis.

### **TERMITE COLONY / MOUND DEMOLITION**

Termite mounds found within the area shall be demolished. The termite queen will be extracted and the soil will be saturated with termiticidal solutions. This method of treatment eliminates the presence of termites in the surrounding.
